

Responding to Reduced Reimbursement

March 16, 2010

A Healthcare Teleconference on How to Combat Industry Changes and Reductions in Medicare Reimbursement

dcma
DADE COUNTY
MEDICAL ASSOCIATION

Medicare cuts which will become effective in 2010 are just the beginning of what could be a decade-long trend of reductions in third-party reimbursement. This downward spiral is exacerbated by managed care contracts tied to Medicare payment rates and the prospect of medical practices being faced with laying out large sums for Electronic Health Records systems or facing even greater reductions in reimbursement. This teleconference presentation will provide insights on how physicians can combat these challenges and a discussion and perspective on:

- Stimulus Money for Electronic Health Records
- Independent Practice Associations
- Large Group Practices
- Managed Care Contracting
- Concierge Practices
