Luis A. Perez and Genesis Martinez Featured in *Mealey's International Arbitration Report*

March 28, 2024

Luis A. Perez and Genesis Martinez are featured thought leaders in the latest edition of *Mealey's International Arbitration Report*. Perez, who chairs Akerman's Latin America and the Caribbean Practice and is the Miami Co-Office Managing Partner, and Martinez, who is a litigation associate, provide their thoughts on what may be the major challenges for arbitration in 2024.

"...it is our opinion that the biggest challenge is presented by Artificial Intelligence ("AI")," the pair shared with *Mealey's*. "This will be the most ominous disruptor of all aspects of our life, but it presents unique challenges that will affect arbitrations. Some of the developments that AI will bring about might be helpful, yet some will, by all accounts, present a hindrance."
