Stephen Streiker guides clients through the legal and regulatory complexities of energy infrastructure, data centers, and technology-driven development. His practice centers on advising data center operators, technology companies, and cloud service providers on the procurement, development, and deployment of advanced infrastructure supporting AI and cloud computing.

Steve regularly counsels on utility coordination, right-of-way and easement agreements, and telecommunications infrastructure, helping ensure projects align with evolving regulatory frameworks and industry standards. He also advises on customer-facing product development and complex technology deployment, IT and vendor agreements, with a strong focus on risk mitigation and compliance in highly regulated environments, including cross-border transactions and operations spanning the European Union (EU); Europe the Middle East, and Africa (EMEA); and Asia-Pacific regions, including U.S.-Japan business ventures.

Steve is experienced in critical data privacy and cybersecurity issues, including compliance with the General Data Protection Regulation (GDPR), the California Consumer Privacy Act (CCPA), and other state and national data privacy regulatory schemes. He also addresses emerging issues related to the deployment of AI in the enterprise.

Known for his pragmatic and solutions-oriented approach, Steve excels at translating technical and operational requirements into actionable legal strategies. He helps clients navigate issues related to data privacy, security, and the integration of emerging and disruptive technologies. His deep understanding of both the legal and operational dimensions of energy and data infrastructure makes him a trusted partner for organizations building and scaling mission-critical technology platforms.
