

Speaking Engagements

Jonathan Wright to Speak at Carbon Unbound East Coast

May 20, 2026

12:00 PM - 12:30 PM ET

Convene One Liberty Plaza

1 Liberty St.

New York, NY

Jonathan Wright will speak on a panel titled “Can Data Centers Become Carbon Removal Hubs?” at Carbon Unbound East Coast in New York. This session will explore how pairing data centers with direct air capture (DAC) can work in practice, leveraging their complementary energy and heat profiles to embed carbon removal directly into the digital economy. Panelists will examine how solid-sorbent DAC technologies, combined with policy incentives like 45Q, create near-term, deployable pathways for decarbonization, and discuss emerging commercial models that could position data centers as anchor customers or regional hubs supporting broader industrial carbon management.

Carbon Unbound East Coast is the premier Carbon Dioxide Removal summit in New York. The conference brings together business leaders, investors, buyers, and policymakers to address carbon removal innovations and investment trends.
