Akerman is partnering with MARCUM LLP and Okapi Partners to host a securities seminar titled, "SEC Executive Briefing: What to Expect for 2014." This program will provide practical advice and insight for preparing 10-K's and proxy statements and conducting a successful annual meeting. As public company representatives prepare their annual disclosure documents and proxy statement for the upcoming proxy season, they should be mindful of SEC initiatives, guidance, and trends that emerged over the past year. In addition to addressing these topics, the program will cover current issues in accounting and reporting, including hot topics in SEC accounting reviews, as well as developments in securities litigation and SEC and DOJ enforcement actions.
