

Practices

Tax

Rapidly changing tax laws, new methods of doing business, and advances in commerce and technology have created a host of compliance challenges for corporate taxpayers and the governmental jurisdictions that attempt to tax them. Creative, practical, and comprehensive tax counsel can help ensure greater predictability, forecasting, tax accounting, and profitability at a time when the burden of enforcement and transparency is greater than ever.

Akerman's Tax Practice Group collaborates with some of the most notable market leaders in the United States and internationally. Recognized by *Law360* as a "Tax Practice Group of the Year" for our precedent-setting work, we help multistate and multinational companies navigate these challenges and disputes and drive growth and expansion in the financial services, retail, e-commerce, sharing economy, digital goods, technology, hospitality, and healthcare sectors, among others. Moreover, we develop novel tax strategies for companies operating at the forefront of disruption—from ridesharing to gaming innovation.

Customized platform enables data-driven business decisions and compliance—quickly and cost effectively.

We are experienced in every aspect of local, state, federal, and international tax laws, as well as employee benefits, executive compensation, and ERISA matters. When growth occurs through M&A, our multidisciplinary team provides the transactional support needed to understand and mitigate tax implications and get deals done. Our team provides practical, forward-thinking solutions through all phases of the business lifecycle, devising tax strategies and vigorously defending our clients in disputes.

In addition, we create customized technology solutions to help businesses manage their tax compliance, taxability determinations, sourcing, tax accounting, and other tax decisions more efficiently. These solutions include the Akerman TaxAbility Matrix, which enables tax departments to keep pace with the continuing changes in local, state, and federal tax laws and regulations.
