

## Practices

# Internet Law

While the continual evolution of the internet creates vast opportunity for business growth, it also presents a variety of mission critical legal challenges. Companies seeking to develop and maintain strong IP portfolios require strategic legal counsel to protect their valuable IP assets in today's ever-changing digital environment.

Akerman's Intellectual Property Practice Group guides middle market clients—from software and app developers to mature telecommunications companies—through complex software patent, software license, and telecommunications issues. From protecting software through patents and licensing to safeguarding website content through copyrights and trademarks, our lawyers draw on diverse technical backgrounds, including computer science and software development, to provide full-scale, cost-effective representation.

## What We Do

- Obtain patent and copyright protection for software applications
- Obtain copyright and trademark protection for website content
- Draft and negotiate software development agreements, software licensing agreements, and website development agreements
- Draft and negotiate co-branding agreements and internet usage and privacy policies
- Protect social media applications
