

Practices

State and Local Tax Consulting

Complying with the statutory and regulatory responsibilities of more than 10,000 state and local tax jurisdictions in the United States can be a significant drain on a company's resources and staff. Multistate and global companies require tax counsel with experience, knowledge, and jurisdiction-specific data to navigate this unwieldy patchwork.

Akerman's State and Local Tax Consulting Practice helps clients achieve a comprehensive solution to compliance and planning. Serving clients across sectors, including financial, automotive/equipment leasing and finance, telecommunication, technology, retail, and hospitality, we advise on contemplated transactions, the formation and maintenance of business entities, and tax planning solutions to help achieve business objectives.

Customized platform enables data-driven business decisions and compliance—quickly and cost effectively.
