Akerman Partner Bruce Stanfill Featured in *Law360* Article Detailing Biden's Climate Change Pledge

June 28, 2021

Law360 published an article by Litigation partner Bruce Stanfill discussing the intricacies of Biden's Climate Change Pledge. Earlier this year, Biden rejoined the Paris Agreement. The Paris Agreement establishes a goal of holding the increase in the global average temperatures to well below two degrees Celsius above preindustrial levels and pursuing efforts to limit the overall temperature increase to 1.5 degrees Celsius. Given the substantial amount of money needed to fund this goal, it is expected that Biden will face many complications throughout this process.

“The reality is that when approaching climate change, the administration faces substantial legal, fiscal and political hurdles. Under the circumstances, continuing regulatory change is the only certainty for the foreseeable future.”
